## About Me

I am a dedicated Angular developer with a passion for creating responsive and user-friendly web applications. With almost 2 years of experience in front-end development, I have honed my skills in leveraging Angular to build dynamic and interactive interfaces. Additionally, I Am Familiar With Backend Development Using Java Spring Boot, Which Complements My Full-Stack Capabilities.

## Experience

- Feb 2022 - Mar 2022

### Angular Trainee

InfoDevelopers Pvt. Ltd.

During the Winter Intake Code Camp, I participated as a trainee in Angular, where I acquired essential front-end technologies. At the culmination of the training program, I successfully applied my knowledge by independently developing a basic e-commerce web application using Angular and the Django framework.

- Apr 2022 - Present

### Angular Developer

InfoDevelopers Pvt. Ltd.

my primary role revolved around the development and maintenance of Angular web applications. I took charge of creating and sustaining these applications, ensuring their smooth operation and performance. Collaborating closely with cross-functional teams, I actively engaged in the design and implementation of new features, contributing to the enhancement of the user experience. Additionally, my work spanned a variety of Angular projects, including management systems and fintech applications, providing me with valuable expertise across diverse domains.

## Projects Involvement

- **Payment Gateway**

A middleware that reads and transfers payment information from a customer's cooperative account to a merchant's account. It communicates with mDabali, CBS and service provider - helps to route the transactions initiated from mobile banking platform-mDabali.

- **mDabali**

A mobile banking platform for Co-operatives and Microfinance that provides seamless online or offline payment services. It enables customer to perform essential banking services like Wallet Load, Utilities Bill Payments, Flight Booking, Fund Transfer, Remittance and so on

- **Centralized Citizen Information Management System**

Nepal Government project, which helps to modernize and digitize the process of acquiring and managing Nepali citizenship. This system marks a significant departure from the traditional paper-based approach, introducing an online platform that streamlines and enhances the entire citizenship application and management process.
